TRIMS

**PRODUCT GUIDE  
2024**

18mm

L SHAPE  
SQUARE  
EDGE

VA.18L.BC55

BRIGHT  
CHROME

Remove the  
protective  
film from  
the trim  
AFTER  
the tiles  
have been  
grouted

Do not use  
any abrasive  
cleaners  
or bleach

All of Vroma's products have a unique label which allows for easy identification of each trim. To make it easier for you we have explained how our labelling system works below.

**VA.18L.BC55**

## Height

This is the internal height of the trim.

It is important that you check the depth of your tile to ensure it will fit with your chosen trim.

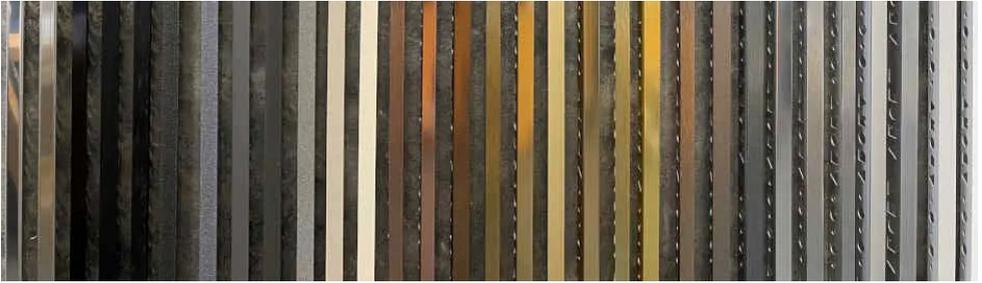

## Trim Shape

The letter tells us which shape trim it is, in this case the trim would be an L-Shape Vroma trim.

## Trim Colour

This part of the code tells us what colour the trim is, in this case the trim is a Bright Chrome.

Vroma was established in 2012 with the goal of catering to the ever expanding aluminium trim market in the UK, by producing a full range of high quality trims at affordable prices. We are proud to say we have met our goal and far exceeded it.

We are specialists in the trim industry and our range, has been touted best in its class for range, quality and price. We have brought “luxury” to suit everyone’s budget, with in-house designers that understand the needs of today’s discerning customer.

Our expertise ensures the quality of our products are superior as we work closely with all of our factories to produce the perfect product.

Packaging is presented in a thoughtful way to ensure minimal waste and ease of handling.

Word-of-mouth has played a huge part in our success and we remain ever-aware that it’s down to the happiness and loyalty of our returning clients that we are fortunate to be in the position we are in. Our client’s satisfaction is paramount to us and we always aim to exceed expectations.

## **ALUMINIUM TRIM**

Our extensive range of aluminium trims ensures there is something for every job.

Our range includes straight, box, round, triangular and t-bar profiles.

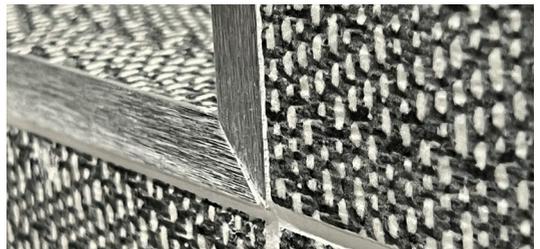

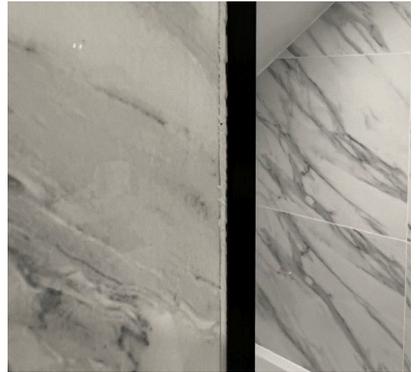

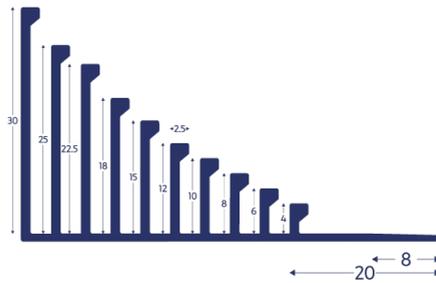

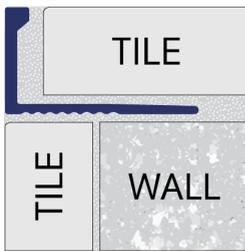

## L-SHAPE ALUMINIUM TRIM

Vroma L-Shape Straight Edge Aluminium tile trims are designed to give your tiling installation a straight edge finish. This is a modern alternative to the traditional round profile trim and is ideal for edging around corners and transitions.

The L-Shape trims are by far our most popular profile and are available in an extensive range of colours.

These trims are easy to mitre ensuring a professional finish every time.

Vroma trims are film protected to assist in a perfect installation without any marks or scratches. All trims are 2.5 meters long unless specified.

Vroma Quadrant Trims are regarded by many as the traditional choice. Designed for strength and style, these trims have a reinforced lip to prevent dents and bends. Its tapered leading edge gives you the option of tiling flush or using a tile that is approximately 2mm smaller than the trim size, to tile under the lip of the trim.

Vroma have designed both the internal and external 3 way corner blocks to match each finish of trim available in this range.

Vroma trims are film protected to ensure perfect installation without any marks or scratches. All trims are 2.5 meters long unless specified.

# ANGLED 304 STAINLESS STEEL TRIM

Vroma Stainless Steel Angled Trim are the standard 304 stainless steel, available in a 0.8mm thickness.

This trim is an important finishing detail for tiled surfaces as it helps to protect the edges of the tiles from chipping or cracking whilst adding a minimalist decorative touch to the overall space.

All Vroma trims are film protected to ensure perfect installation without any marks or scratches. All trims are 2.5 meters long unless specified.

Brushed Finish

ASS.A.BF304	Brushed Finish	10 12

Vroma Rolled Stainless Steel Adhesive Strips are the standard 304 stainless steel, offering a variety of widths to suit your needs. Specifically designed to complement our stainless steel trims, these strips serve as the perfect finishing touch for any comprehensive design installation.

For added convenience, these trims feature a self-adhesive backing, ensuring easy application in your chosen space.

The rolled stainless come on rolls that are 3 meters.

# L-SHAPE STAINLESS STEEL 316 TRIM

Vroma Stainless Steel 316 Tile Trims are commonly known as marine-grade stainless steel. They are more resistant than 304 stainless steel to corrosion and pitting and also have excellent strength and durability at high temperatures.

Stainless Steel 316 Tile Trims are used in applications where the tile is exposed to high temperatures and or corrosive environments, such as commercial kitchens or outdoor environments. They are also used where the tile will be subject to heavy foot traffic as it is resistant to scratching and wear. All Vroma trims are film protected to ensure perfect installation without any marks or scratches. All trims are 2.5 meters long unless specified.

### **Tile Levelling System**

full range of sizes available 1mm,1.5mm,2mm,2.5mm,3mm in the clips.

Using a tile levelling system can be particularly beneficial for large-format tiles, where the risk of lippage is higher due to their size and weight. These systems help both professional and DIY tile installers achieve a more precise and visually appealing result.

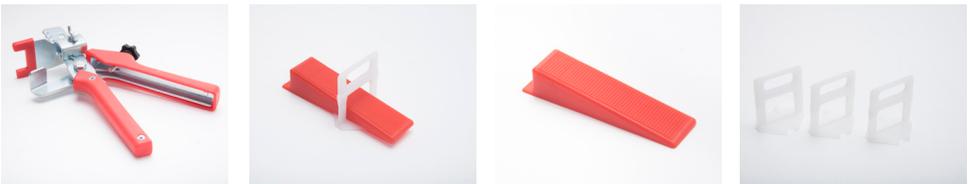

### REUSABLE TILE LEVELLING KIT

Our specialised tile leveling tool ensures a streamlined installation process by securely fastening wedges for a tight and precise tile alignment. Available in packs of 50 with removable pins, each set includes a wrench for added user convenience. Plus, with replacement pins available, there's no need to invest in a whole new set each time. Upgrade your installation experience with ease and efficiency.

### WEDGE, CLIPS AND TOOL

Our Tile Pliers, a vital component in our tile leveling system for effortless installation. These pliers secure wedges, ensuring a snug fit between tiles. Paired with our Tile Leveling Clips and Wedges, achieve flawless alignment effortlessly. The clips maintain even gaps, and reusable wedges guarantee a level surface. Elevate your tile installation with this essential duo and the precision of our Tile Pliers.

## LED PROFILES

Our extensive range of profiles ensure there is something for everyone. We have profiles suitable for tiles, plaster and decorative use.

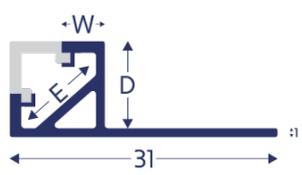

Vroma LED Profiles are available a wide range of profiles offering endless possibilities. These trims have a timeless matt chrome finish and are suitable for both commercial and domestic use, these LED Profiles can be used in many areas of tiling and building projects. They accept universal LED systems offering unlimited freedom of design.

Vroma LED profiles are not waterproof and are not suitable for use in zones 0 or 1.

Vroma trims are film protected to ensure perfect installation without any marks or scratches. All trims are 2.5 meters long unless specified otherwise.
